

Dear Supporter,

I hope you are doing well! Over here, we are very busy and making solid progress.

Record Annual Results

On March 31st, we announced that our revenues for 2016 grew by more than 430%, and gross profits by over 1,200%!

Now we have a major breakthrough to announce on the technology side:

World's Second Largest Oil Company!

Have you heard of Sinopec? It's bigger than all the Western oil companies.

It's Asia's largest oil and gas company, and the second largest in the world, as listed in the Fortune Global 500.

Pilot Program Launches

In April, we launched a pilot program at a Sinopec site in Southwest China.

The Sinopec site manager said:

“We're proud to see OriginClear leading the way with a process that is chemical-free and extremely energy-efficient, while simultaneously saving operators money.”

It's rare that a multinational company is willing to discuss our technology. We are grateful!

Be sure that you are receiving my regular updates to hear the rest of the story!

Garbage Juice...

Officially, it's called “landfill leachate.”

It's the stuff that comes out of a landfill when it rains. Also known as “black water,” or “garbage juice.”

As you can imagine, this is very nasty, smelly stuff. The solids and oils (yecch!) make it a tough treatment challenge.

OriginClear can handle it.

First Order

We've received the first paid order to treat landfill water in Malaysia. It's to treat 100 metric tons per day. That could go to 400 tons, to handle overload during the rainy season...

Nice work by our Malaysian partners!

We also are bidding on very large sites in China.

Signing ceremony in the VIP meeting room, Dong Ying Economic Development Zone.

University Partner

We now have a research partnership with Florida Atlantic University (FAU) in Boca Raton, FL. This specifically focuses on landfill water treatment.

We think that FAU will help us enter the U.S. market for treating landfill “garbage juice” ...

Water is Like Biotech

You know how it works in biotech. The years of research and testing in pursuit of that FDA approval... and then it hits.

Water is like that. It takes 12 to 14 years to get a new water technology adopted. We're making commercial progress now, just five years into it.

That is pretty amazing!

And you are the one who's made it happen for us. THANK YOU for your loyalty and continuing support!

Investing in OriginClear*

From time to time, we offer our shareholders a chance to acquire more shares from us directly, on special terms.

If you're interested, please call (323) 939-6645, extension 116, or email invest@originclear.com.

There's also a handy reply card, which you can use. We hope to hear from you soon!

My deepest regards,

A handwritten signature in black ink, appearing to read "RECKELBERRY".

Riggs Eckelberry
CEO, OriginClear, Inc.

PS: Call or email as soon as you can! Important: you must be an accredited investor.
